Auxiliary Transfer Switch Contact Kit

Model Number:
G005621-0

DESCRIPTION

The auxiliary transfer switch contact kit allows a single large electrical load to be locked out from generator operation. If a home is equipped with electrical heat or multiple central air conditioning units, this device allows the generator transfer switch to interrupt the control wire, breaking the signal needed for the appliance to turn on.

INSTALLATION INFORMATION

- Once installed, the control wire must be run from the appliance to the transfer switch to connect to the contact.
- Compatible with 100, 150 and 200 amp, single phase switches only.

Paint Kit

Model Number:
G006160-0

DESCRIPTION

The generator enclosure is the first line of defense against the elements and is important to keep in good condition. If the generator enclosure is scratched or damaged, it is important to touch up the paint to protect from future corrosion. These paint kits include the necessary paint to properly maintain or touch up a generator enclosure.
